DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-26, drawn to a screw, classified in class 411, subclass 386
- II. Claims 27-30, drawn to method of using a screw, classified in class 29.

The inventions are distinct, each from the other because of the following reasons:

Inventions I. and II. are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product (screw) as claimed can be used in a materially different process requiring a screwdriver or drill. The method may be practiced with a screw having different features as is known in the art.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Scott A. Horstemeyer on 11 January 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3677

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
